**DISCUSSION:** EPA conducted a Preliminary Assessment (PA) for the Liberty Forge, INC. site in Liberty, Texas. The site is an active steel forge/fabrication facility. Site began operations in 1975, and has continued to operate.

During the PA site inspection, Texas Natural Resource Conservation Commission staff could not identify any waste source which required investigation under CERCLA. Since no waste sources have been identified, the site should be considered as a non-site. In addition to the non-site status, the TNRCC has been actively monitoring solid waste activities at the site.

Therefore, the Site Assessment Section recommends that the site receive a **No Further Remedial Action Planned under Superfund (NFRAP) Decision**. The site has been referred to the Texas Natural Resource Commission for possible assessment under the state regulatory authorities.
